Regional Innovation valleys official definition

The Regional Innovation Valleys initiative aims to harness the full innovation potential across Europe, connecting less innovative regions with more innovative ones, and addressing social challenges through cutting-edge technology.

Regions identify their own competitive advantages to bridge the innovation divide and use their complementary strengths for improved research and innovation ecosystems through concrete interregional innovation projects.

The RIV initiative supports the strategic alignment of regional and EU-level innovation policies, contributing to the goals of Cohesion Policy and Horizon Europe and encourages knowledge exchange, technology diffusion, and the creation of cross-regional value chains in Europe.

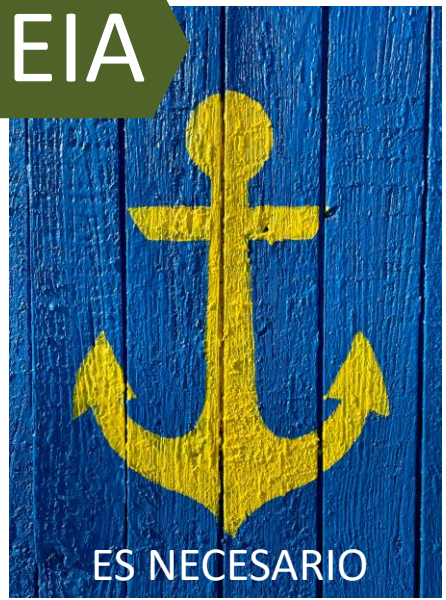

Traducción libre de la definición oficial

La iniciativa de los Valles Regionales de Innovación apoya a consorcios de regiones **"altamente innovadoras "** y **"emergentes en innovación"** con un **plan de acción compartido** (en alguno de los verticales que se definen desde la UE) para mejorar sus ecosistemas de innovación de manera holística, financiando de manera conjunta **proyectos interregionales de innovación** con ayuda de la COM y **movilizando fondos extras** regionales.
